

Solar Power Plus extra benefits

Installing an SP Plus energy kit to your home, office or factory can provide clean green energy 24/7.

During normal operation, the SP Plus energy kit converts energy produced from Solar Panels, Wind Turbine or Micro Hydro system to AC electricity to run your 240volt loads.

Any excess energy is then fed to the electricity grid to effectively run your meter backwards.

If your energy source is Solar Panels, it is possible that your electricity retailer will buy this excess electricity from you at a premium rate, this is called a "Feed In Tariff".

The more excess energy you export into the grid, the more money you can make and the smaller your carbon footprint will be.

An SP Plus energy kit includes a battery bank, ensuring you continue to enjoy the benefits of clean energy even when the electricity grid fails.

Today's lifestyle makes no allowance for living without electricity, even for brief periods, especially during emergency situations.

When there is a power outage on the electricity grid, the SP PRO seamlessly switches to battery back up, allowing you to power your home, appliances and equipment using the power from the batteries.

All you need to do is inform your system designer and installer which equipment you would like to power during a power outage. This may be the whole house or particular appliances or equipment like lights, radio and water pumps.

Your system designer will then be able to recommend an appropriately sized system for you.

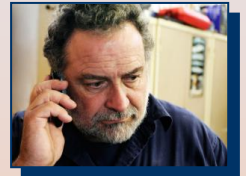

At the heart of every SP Plus energy kit is an SP PRO Interactive Inverter charger. Proudly designed and manufactured in Australia.

Power your appliances and equipment in times of an emergency.

In times of power outages consider the advantages when you install an SP Plus energy kit.

Telephone

Make calls to assist in an emergency, mobile phones are often jammed during these times.

Lighting

Have lighting available to keep your family safe.

Water Pump

Remove water from flooded areas or fight fires to protect your property and home.

Internet

Monitor websites such as emergency services, fire brigade and weather.

Refrigeration

Avoid spoiling medical supplies and other perishable goods.

Radio

Monitor important national radio updates.

SP PRO Series

INTERACTIVE INVERTER CHARGER

Giving you power when you need it most.

2500 W/24V | 3500 W/24V
4000 W/48V | 6000 W/48V

- ✓ Grid quality Sine Wave power
- ✓ No break power
- ✓ Huge start up capacity
- ✓ Fast battery recharge
- ✓ Set and forget operation
- ✓ Easy to read display
- ✓ Computer interface
- ✓ Safe for all batteries
- ✓ Designed for high temperatures
- ✓ Built tough in Australia
- ✓ Up to 7 years warranty
